

MOSTAFA MOHAMED ATEF EL-NOURAG

Artificial Intelligence Student

+20 109 791 6328 mostafaatefxz@gmail.com Kafr El Sheikh, Egypt

LINKEDIN

GITHUB

PROFESSIONAL SUMMARY

Artificial Intelligence student with practical training in Machine Learning and hands-on experience building data analysis, machine learning, and software projects. Skilled in Python, Pandas, NumPy, scikit-learn, data preprocessing, visualization, and model evaluation, with additional Android development experience. Seeking an AI / Machine Learning role where technical skills are applied to real-world problems, with scope for continued professional growth.

EDUCATION

Bachelor's Degree in Artificial Intelligence

Expected Graduation: 2027

Kafr El Sheikh University, Egypt — Specialization: General Artificial Intelligence

Relevant Coursework

Machine Learning

Deep Learning Fundamentals

Data Structures & Algorithms

Probability & Statistics for AI

Data Analysis & Visualization

Computer Vision Basics

Introduction to NLP

TRAINING & CERTIFICATIONS

Machine Learning Summer Training — NTI & ITIDA

16 Aug 2026 – 10 Sep 2026 · 120 Hours · Score: 95.3%

Mobile Application Development Trainee — DEPI

Mobile Development & Software Engineering

- IEEE Certificate
- Advanced AI & Machine Learning courses
- Data Analysis with Python
- Software Engineering & System Design Basics

TECHNICAL SKILLS

Programming

Python

Kotlin

Java

SQL

AI & Machine Learning

Machine Learning

Data Preprocessing

Feature Engineering

Classification

Regression

Model Evaluation

Deep Learning (basics)

Data & Tools

Pandas

NumPy

Matplotlib

Seaborn

Jupyter Notebook

scikit-learn

TensorFlow / PyTorch (basics)

Software & Architecture

Git

GitHub

Android Development

OOP

Clean Architecture

MVVM

Retrofit

Hilt

Room

Firebase

PROJECTS

MEDTRIAGE-AI

Python, Jupyter Notebook

Machine learning project focused on healthcare-related prediction, covering data preparation and model development.

Heart Disease Prediction

Python, Jupyter Notebook

Classification project for heart-disease prediction built on a complete machine learning workflow.

Car Price Predictor

Python

Regression-based project predicting car prices from structured data.

TO EGY

Kotlin

Published smart tour guide Android application providing information about Egyptian tourist attractions.

News App

Kotlin, XML

Android news application developed as part of mobile development practice.

EXPERIENCE & STRENGTHS

Applied OOP, modular design, Git version control, team collaboration, data cleaning, preprocessing, visualization, and model evaluation through training and self-driven projects.

- **Soft Skills:** Problem Solving, Analytical & Critical Thinking, Fast Learning, Adaptability, Team Collaboration, Time Management

LANGUAGES

Arabic

Native

English

Good — Technical Reading & Writing
